TEST
on the theme “Non-finite verbs”

Find the right variant.

1. Verbids express:

- | | | | |
|---|--|---|--------------------------|
| a) the predicative function of the sentence | b) some kind of process but modified in the nature of the concrete type of verbids | c) the categorical semantics of property of a substance | d) property of an action |
|---|--|---|--------------------------|

2. The adverb-type combinability of the present participle is revealed ...

- | | | |
|---|--|---|
| a) in its association with the modified verbs | b) in its being combined with auxiliary finite verbs | c) in its association with the modified nouns |
|---|--|---|

3. The prepositional absolute construction with Participle II is introduced by preposition:

- | | | | |
|-------|--------|---------|-------|
| a) in | b) for | c) with | d) of |
|-------|--------|---------|-------|

4. The infinitive paradigm of the non-objective verbs includes:

- | | | | |
|------------|------------|------------|------------|
| a) 2 forms | b) 4 forms | c) 6 forms | d) 8 forms |
|------------|------------|------------|------------|

5. If the infinitive in free use has its own subject, it is introduced by:

- | | | | |
|-------------------|-------------------------------|-----------------------|-----------------------|
| a) preposition of | b) prepositional particle for | c) preposition before | d) conjunction before |
|-------------------|-------------------------------|-----------------------|-----------------------|

6. The gerund combines the properties of:

- | | | | |
|--------------------------------|-------------------------------|-------------------------------|--------------------------|
| a) the verb and the participle | b) the noun and the adjective | c) the adjective and the verb | d) the verb and the noun |
|--------------------------------|-------------------------------|-------------------------------|--------------------------|

7. The present participle combines the properties of:

- | | | | |
|--------------------------|-------------------------------|----------------------------|---|
| a) the verb and the noun | b) the verb and the adjective | c) the verb and the adverb | d) the verb, the adjective and the adverb |
|--------------------------|-------------------------------|----------------------------|---|

8. The opposition of the finite verbs and the verbids is based on:

- | | | |
|---|---|------------------------|
| a) the expression of the functions of full predication and semi-predication | b) the combinability with other parts of the sentence | c) the semantic nature |
|---|---|------------------------|

9. If the infinitive in free use has its own subject different from that of the governing construction it's introduced by:
